PROFESSIONAL SUMMARY

Software developer with a Bachelor of Technology in Computer Science and a Post Graduate Diploma in Web Development from Conestoga College. Professional experience writing and debugging XML scripting embedded within Java services on the IBM Sterling Order Management platform, developing Angular front-end components, and deploying releases through Jenkins. Complements this with self-directed full-stack project work across React, Node.js, Express, GraphQL, and MongoDB. Comfortable in test-driven support environments and experienced in mentoring junior developers.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, XML, SQL, HTML, CSS

Frontend: Angular, React, Redux, Bootstrap, Tailwind, responsive design

Backend: Node.js, Express.js, GraphQL, REST APIs, JWT authentication

Databases: MySQL, MongoDB

Enterprise Platforms: IBM Sterling Order Management System (OMS)

DevOps & Tools: Jenkins, Git, CI/CD pipelines, Jira, Confluence

Testing & QA: Functional testing, test data generation via XML scripting, defect reproduction, unit testing, UAT support

TECHNICAL PROJECTS

OpsPilot — Jira-Style Project Management System | React, Node.js, Express, MongoDB

Live demo: <https://opspilot-775n.vercel.app>

- Designed and built a Jira-inspired application for managing projects, issues, priorities, and statuses with a clean, intuitive interface.
- Implemented workspace-based project and issue tracking with full CRUD operations, enabling scalable multi-tenant usage.
- Secured routes and APIs using JWT-based authentication and followed a modular, maintainable backend architecture.
- Built a responsive interface using modern React component patterns.

Hospital Management System | React, Node.js, GraphQL, MongoDB, JWT, Stripe

- Developed a full-stack management system with role-based access for administrator, clinician, and patient users.
- Implemented real-time dashboards and data-driven views for monitoring operational metrics.
- Secured the application with JWT-based authentication and authorization and optimized performance, SEO, and accessibility.
- Integrated the Stripe API for secure online payment processing and transaction flow design.

Drive Test Booking Application | Node.js, Express, EJS, MongoDB

- Built a server-side rendered booking platform handling end-to-end user registration, login, and appointment scheduling.
- Implemented secure authentication, session management, and RESTful APIs for booking management.

PROFESSIONAL EXPERIENCE

Associate Software Developer | BNED LoudCloud, Mumbai, India | May 2021 – Sep 2022

- Wrote and maintained XML scripts embedded within Java services on the IBM Sterling Order Management platform, supporting business logic and configuration changes.
- Debugged Java application code to identify and resolve defects reported through production tickets, performing root cause analysis and implementing fixes.
- Developed and maintained front-end components using Angular for internal application interfaces.
- Built and executed test scenarios by generating user orders through custom XML scripts, reproducing defects and validating fixes before release.
- Deployed application code across development, test, and production environments using Jenkins as part of scheduled release cycles.
- Tested new and modified features end to end, verifying expected behaviour prior to deployment.
- Documented proof-of-concept work and technical analysis in Jira and Confluence for team-wide reference.
- Mentored and onboarded 4–5 newly joined technical associates, covering platform architecture, coding practices, and internal tooling.

Machining & Tooling Inspector | [Company Name], Ontario, Canada | 2025 – Present

- Inspect precision-machined components against engineering drawings and dimensional tolerances while maintaining continuous full-time employment in Canada.

EDUCATION

Post Graduate Diploma in Web Development — Conestoga College, Ontario, Canada | 2023 – 2024

Bachelor of Technology, Computer Science — S.R Engineering College, India | 2016 – 2020

CERTIFICATIONS

Postgraduate Program in Full Stack Product Engineering

Front End Development — freeCodeCamp

Responsive Web Design — freeCodeCamp
